

asknet Solutions AG

Reuters: ASKN Bloomberg: ASKN:GR

Capital increase fully placed

The activities financed by the capital increase will lead to a dynamic growth in sales and earnings, in our view, which will, however, be offset by the dilutive effect of the capital measure. Thus, we confirm our price target of EUR 8.60, which is derived from a three-stage DCF entity model but has been adjusted for the new number of outstanding shares, and our Buy rating for the shares of asknet Solutions AG. Our target price is based on the expectations for sales and gross profit of the three business segments for 2023e presented by the Executive Board and confirmed at yesterday's German Equity Forum in Frankfurt, which we believe would result in a significant undervaluation of the shares.

Capital increase placed as expected

asknet Solutions has successfully placed a cash capital increase with a subscription ratio of 2:3 (two old shares entitled the holder to subscribe to three new shares). Through the capital increase, the share capital rises by 1,961,295 shares from 1,307,530 shares to 3,268,825 shares. 828,523 shares (42.2%) were subscribed by existing shareholders, the remaining 1,132,772 shares (57.8%) were subscribed by a new investor, currently not named.

Key data of the rights issue

At a subscription price of EUR 3.50 per share, the net proceeds of the rights issue amount to EUR 6.8 million, which, according to the company, will be invested in strategic projects and acquisitions in the Academics and New Pipeline business units (75%), in technology enhancements and additional resources and marketing activities in the eCommerce Solutions business unit (15%), and held as a liquidity reserve and for other operational improvements (10%).

Significant dilution effects from the capital increase

Excluding any additional growth potential that we believe is possible from the capital increase, the resulting dilutive effect on earnings per share 2024e is 60.0% according to our calculation. Based on the new number of outstanding shares, our price target is accordingly reduced by 60.0% from EUR 21.40 to EUR 8.60 per share.

Rating: Buy Risk: High

Price: EUR 4.50

Target price: EUR 8.60 (adjusted by capital increase)

In the medium term, our base case scenario results in an equity value of EUR 28.0 million or EUR 8.60 per share

The enterprise value of asknet Solutions in our model is EUR 25.7 million. From this, 9.0% is derived from the terminal value, 57.8% and 33.2% from the cash flows generated in the detailed and rough planning phase, respectively. Adding the net financial position (at the end of the 2020 financial year) of approximately EUR 2.3 million (based on excess cash) results in an equity value of EUR 28.0 million or EUR 8.60 per share.

Value of equity of EUR 28.0 million or EUR 8.60 per share

			Comment	1
Probability of insolvency in the terminal value	%	7.2%	Synthetic rating B- with 10% RR and CDS of 900 basis points	
Terminal cost of capital	%	5.1%	500 basis points long-term risk premium to 30-year German government bonds

Scenario analysis through Monte Carlo simulation

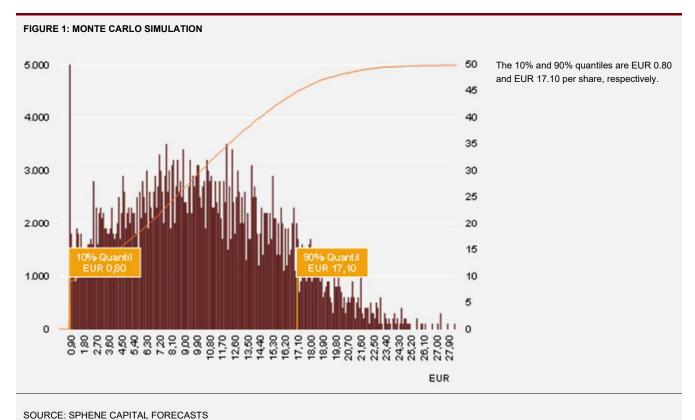

We then performed a Monte Carlo simulation to examine the sensitivities of the enterprise value with respect to independent input variables. We performed a multivariate analysis and tested the results of the DCF model according to the following seven criteria and specific standard deviations (σ) .

Į:	s σ
	•
6 2.6%	% 3.0%
6 0.19	% 3.0%
6 1.3%	% 2.0%
6 1.5%	% 2.0%
6 30.0%	% 3.0%
6 1.00	0 3.0%
6 7.2%	% 0.7%
10 10 10	6 0.19 6 1.39 6 1.59 6 30.09 6 1.0

Wide range of valuation results

This shows that the 10% and 90% quantiles of the equity value are EUR 2.6 million (EUR 0.80 per share) and EUR 55.9 million (EUR 17.10 per share), respectively. The results of the Monte Carlo simulation are summarized in Figure 1 below:

Monte Carlo simulation with 10% and 90% quantile price targets between EUR 2.6 and 55.9 million or EUR 0.80 and EUR 17.10 per share.

Confirmation of our Buy rating for the shares of asknet Solutions

Compared to the current share price of EUR 4.50, the equity value we have calculated, based on the sales and gross profit guidance issued by the management for 2023e, results in an expected share price potential of 91.1% over a period of 24 months. We therefore confirm our Buy rating for the shares of asknet Solutions AG.

Multiples on reaching our DCF-based target price

Based on our financial forecasts and if the equity value we calculated (base case scenario in the DCF valuation model) of EUR 8.60 per share is reached, asknet Solutions would be valued at the multiples below:

SOURCE: SPHENE CAPITAL FORECASTS

Risks to the achievement of our price target

We see the following weaknesses and downside risks for the achievement of our price target:

- Improvable profitability, as asknet Solutions has hardly been able to achieve positive operating results in recent years,
- possible obligations to pay default interest on VAT in the amount of up to EUR 0.764 million,
- somparatively low liquidity of the shares...
- ...with unusually high volatility of the shares,
- **o** dependencies on management ("key man risk") and major investors.

Catalysts for performance

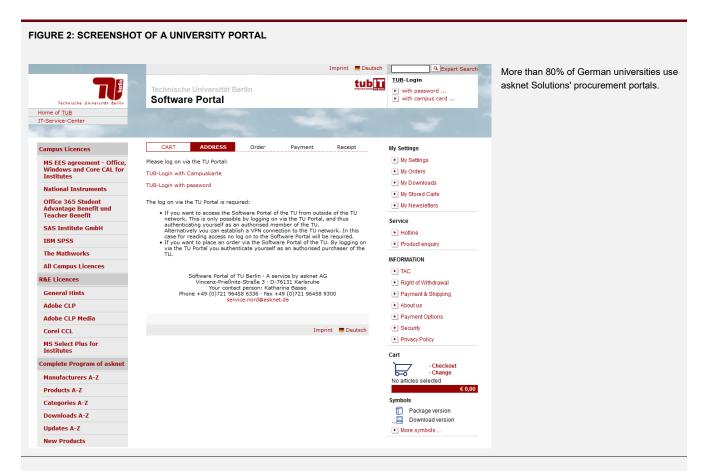

We see the most important catalysts for the development of asknet Solutions' share price in the coming months in

- Reports of better than expected earnings development in the current financial year,
- M&A activities in the education sector,
- Reports on the acquisition of new customers, including in particular educational institutions, and news on strategic partnerships.

asknet Solutions' business activities focus on the development and operation of software procurement portals for universities, colleges, research institutes, university hospitals and companies in the form of central intranet portals. These procurement portals enable authorized users to purchase software products, usually at more favorable conditions than in the stand-alone case. asknet Solutions operates in this business unit exclusively in German-speaking countries. The second business unit, eCommerce solutions, is to be strengthened through targeted investments and strategic projects in its three areas of competence: technology platform, merchant-of-record services, and payment facilitation services and solutions. In the third area, New Pipeline, strategic partnerships are to be concluded within the EduTech sector.

Core business: Portals for scientific institutions and universities

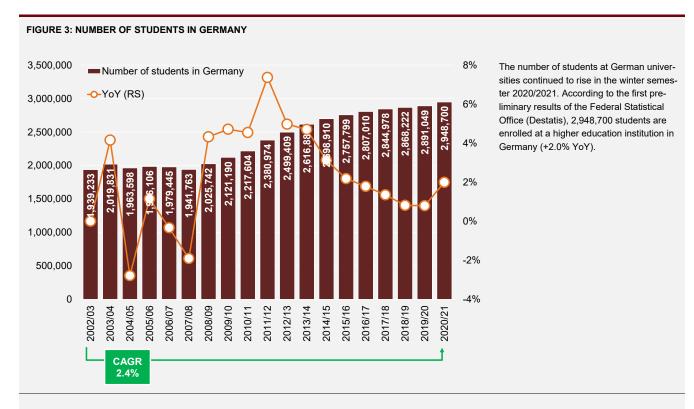

asknet Solutions' core business is the development and operation of customized software and hardware procurement portals used in universities, research institutions, university hospitals and companies. Via a central intranet site, employees, scientific staff and students of the teaching institutions can procure software products with appropriate usage rights and download them to their computers. The procurement portals are seamlessly linked to the intranet of the respective institutions. Within the scope of the volume licenses agreed upon by asknet Solutions, users can purchase the software products offered at significantly reduced conditions, especially in the field of science. The asknet Solutions procurement portals allow students and university employees to download software (packages) at discounted rates.

SOURCE: COMPANY DATA, SPHENE CAPITAL

For these services, asknet Solutions receives a percentage of the gross or net revenues generated from the sale of digital products or from software updates via the online shop.

According to our estimates, 85% of the revenue is generated from the resale of software from more than 130 software vendors and 15% from the development and maintenance of the e-procurement portal via a software-as-a-service (SaaS) model as well as other customer-specific services, such as from Office 365, marketing or SEO services.

SOURCE: FEDERAL STATISTICAL OFFICE, SPHENE CAPITAL

Considerable savings potential

In recent years, German higher education institutions have concluded large-volume license agreements at both university and state level in order to save costs. The advantage of a central procurement portal is that the individual HEIs have a central information, procurement and distribution platform that enables them to efficiently procure, distribute and bill for software.

This means that software licenses no longer have to be purchased for each individual PC; instead, the institutions pay license fees depending on the number of employees and users, who can then use the licensed desktop software on any computers and devices of the respective universities as well as for working on their private computers. In addition, the framework agreements concluded with asknet Solutions offer universities uniform conditions. These facilitate license management and enable a higher degree of standardization. The potential savings in procurement time and costs are thus considerable in our estimation.

asknet Solutions suppliers and customers

The suppliers of the software are, on the one hand, software developers such as Microsoft or Adobe and, on the other hand, the classic distributors such as Ingram or

Basically, all universities are potential customers of asknet Solutions.

asknet Solutions is exclusively present in the German-speaking region. With more than 80% of the universities, asknet Solutions clearly holds the market leadership. TechData. Four software manufacturers - Microsoft (49%), Adobe (21%), Ansys (11%) and IBM (6%) - are reported to be responsible for about 85% of gross resale revenues.

asknet Solutions' customers are universities and technical colleges such as the Free University of Berlin or RWTH Aachen, university hospitals, and scientific research institutions such as the Max Planck Society or the Karlsruhe Research Center. The focus of the company's business activities is on German-speaking countries. According to the company, the customer structure is highly diversified.

Competitive environment

Currently, according to information, more than 80% of German universities and universities of applied sciences are asknet Solutions customers. Competition comes from three companies: Software 1, Cancom and Crayon. However, as Table 8 below shows, we believe that these companies are positioned worse than asknet Solutions in key respects.

	asknet Solutions	Software 1	Cancom	Crayon
Complexity of the procurement portal				
Number of software manufacturers offered			•	
Possibility of customisation				
Interface to SAP				
Role-based functionalities				

Expansion of the service offer planned

In addition, it is planned to expand the Academics business unit beyond its original focus on the higher education sector to the entire education market, including schools, especially secondary schools, adult education and employee training. To this end, partnerships have been established with leading EduTech company Blackboard and with Digital Domain, the world leader in visual effects, virtual reality, digital humans and virtual human technology.

Disclaimer

This report has been prepared and published by Sphene Capital GmbH within the jurisdiction of the Federal Republic of Germany. It is intended only for persons who, in connection with their trade, profession or employment, acquire or sell transferable securities for their own account or for the account of others. This study is for general information purposes only and is provided on a confidential basis. It is intended solely for the use of its recipients. It may not be reproduced in whole or in part or distributed to third parties without the written consent of Sphene Capital GmbH. The investment opportunities discussed in this study may not be suitable for certain investors, depending on the respective investment objective and planned investment period or the respective financial situation. This study is not a substitute for individual advice. Please contact the investment advisor of your bank.

This study may only be distributed in other jurisdictions in accordance with the law applicable there. Persons into whose possession this study comes should inform themselves about and comply with any applicable laws. This study or a copy of it may only be distributed in the United Kingdom to the following recipients: (a) persons who have professional experience in investment matters falling within section 19(1) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001 (the "Order"), or (b) companies with substantial assets falling within Article 49(2)(A) to (D) of the Order and any other person to whom the document may lawfully be communicated under Article 49(1) of the Order (all such persons together being referred to as "Relevant Persons"). Any person who is not a Relevant Person should not consider this Study and its contents as a basis for information or action.

This study constitutes neither an offer nor an invitation to subscribe to or purchase a financial instrument of the analyzed company or to conclude an advisory contract. Neither this study nor any components therein form the basis of any contract or other obligation of any kind. Sphene Capital GmbH/its affiliated companies and the employees involved in the preparation of the study disclaim any liability for damages in connection with the publication and/or use of this study or its contents as well as for damages arising either directly or as a consequence of the use of information, opinions and estimates contained in this study. Neither Sphene Capital GmbH/its affiliated companies nor the employees involved in the preparation of the study provide any warranty or assurance regarding the completeness and accuracy of the information contained in this study. No independent verification of the information used has been undertaken. All evaluations, opinions and predictions contained in this study are those of the authors of this study made in connection with their research activities. They reflect the state of affairs at the time this study was prepared and may change as a result of future events and developments. Neither Sphene Capital GmbH/its affiliates can automatically be held responsible for such statements. A future update of the analysis and recommendation is not fixed in terms of date and its timing is generally not foreseeable; however, it usually follows the publication of corresponding financial reports. Sphene Capital GmbH reserves the right to revoke or change opinions expressed in the study at any time and without prior notice. Sphene Capital GmbH may have published studies that reach different conclusions with regard to the information contained in this study. These studies may reflect the different assumptions and approaches of their authors. Past statements should not be taken as an indication or guarantee of subsequent statements. Rather, no representations or warranties, express or implied, are made with respect to future statements.

This study is sent via the industry news agencies, financial portals and by email to all interested professional investors who are deemed not to make their investment decisions inappropriately based on this study.

The competent authority is the Federal Financial Supervisory Authority (BaFin).

The securities prices quoted in this study are XETRA closing prices on the trading day preceding the respective publication date. If the security is not traded on XETRA, the security prices quoted in the study are the closing prices of the respective stock exchange on the trading day preceding the publication date of the study.

An overview of the investment recommendations of Sphene Capital GmbH is available at http://www.sphene-capital.de.

Declarations pursuant to Section 85 (1) WpHG and Article 20 Regulation (EU) No 596/2014 and Delegated Regulation (EU) 2016/958: Sources of information

The study is based on information obtained from carefully selected publicly available sources, in particular financial data providers, the publications of the analyzed company and other publicly available media.

Valuation principles/methods/risks and parameters

Company-specific methods from fundamental share analysis, quantitative statistical methods and models as well as procedures from technical analysis were used for the preparation of the study (inter alia historical valuation approaches, substance valuation approaches or sum-of-the-parts valuation approaches, discounting models, the economic profit approach, multiplier models or peer group comparisons). Valuation models depend on economic variables such as currencies, interest rates, commodities and economic assumptions. In addition, market sentiment and political developments influence company valuations. The approaches chosen are also based on expectations that can change quickly and without warning depending on industry-specific developments. Consequently, the recommendations and price targets also based on the individual models can change accordingly. The investment recommendations based on a period of twelve or 24 months may also be subject to market conditions and therefore represent a snapshot. The expected price developments may be achieved more quickly or more slowly or may be revised upwards or downwards.

Declaration Compliance

Sphene Capital GmbH has taken regular internal precautions to prevent conflicts of interest regarding the analyzed company and to disclose potential conflicts of interest. All employees involved in the preparation of this study are subject to the internal compliance regulations of Sphene Capital GmbH. The remuneration of the employees is neither directly nor indirectly related to the preparation of this study. Susanne Hasler, susanne.hasler@sphene-capital.de, is responsible for compliance with these arrangements.

Sources of information

Parts of the information required for this study were provided by the issuer of the analyzed security. In addition, this study is based on publicly available information that is considered reliable (such as Bloomberg, Reuters, VWD-Trader and press releases). Sphene Capital GmbH has checked this information for plausibility, but not for accuracy and completeness.

Declaration of the authors of the studies

This study was prepared by the research analyst(s) named on the cover page. The views expressed in this study do not necessarily reflect the views of Sphene Capital GmbH/any of its affiliates. The analyst(s) is/are solely responsible for the opinions and assessments expressed in this report. The author(s) of this report confirm that all valuations, opinions and predictions contained in this report are in accordance with their views. The remuneration of the author(s) of this study is not directly or indirectly related, past, present or future, to the recommendations or views expressed in the study. The views of the author(s) of this report have not been influenced at any time by the issuer. Parts of this report may have been sent to the issuer for information purposes prior to publication, but no material changes have been made subsequently.

This study was completed on 25.11.2021 at 08:30 h. Last price at the time of completion: EUR 4.50.
